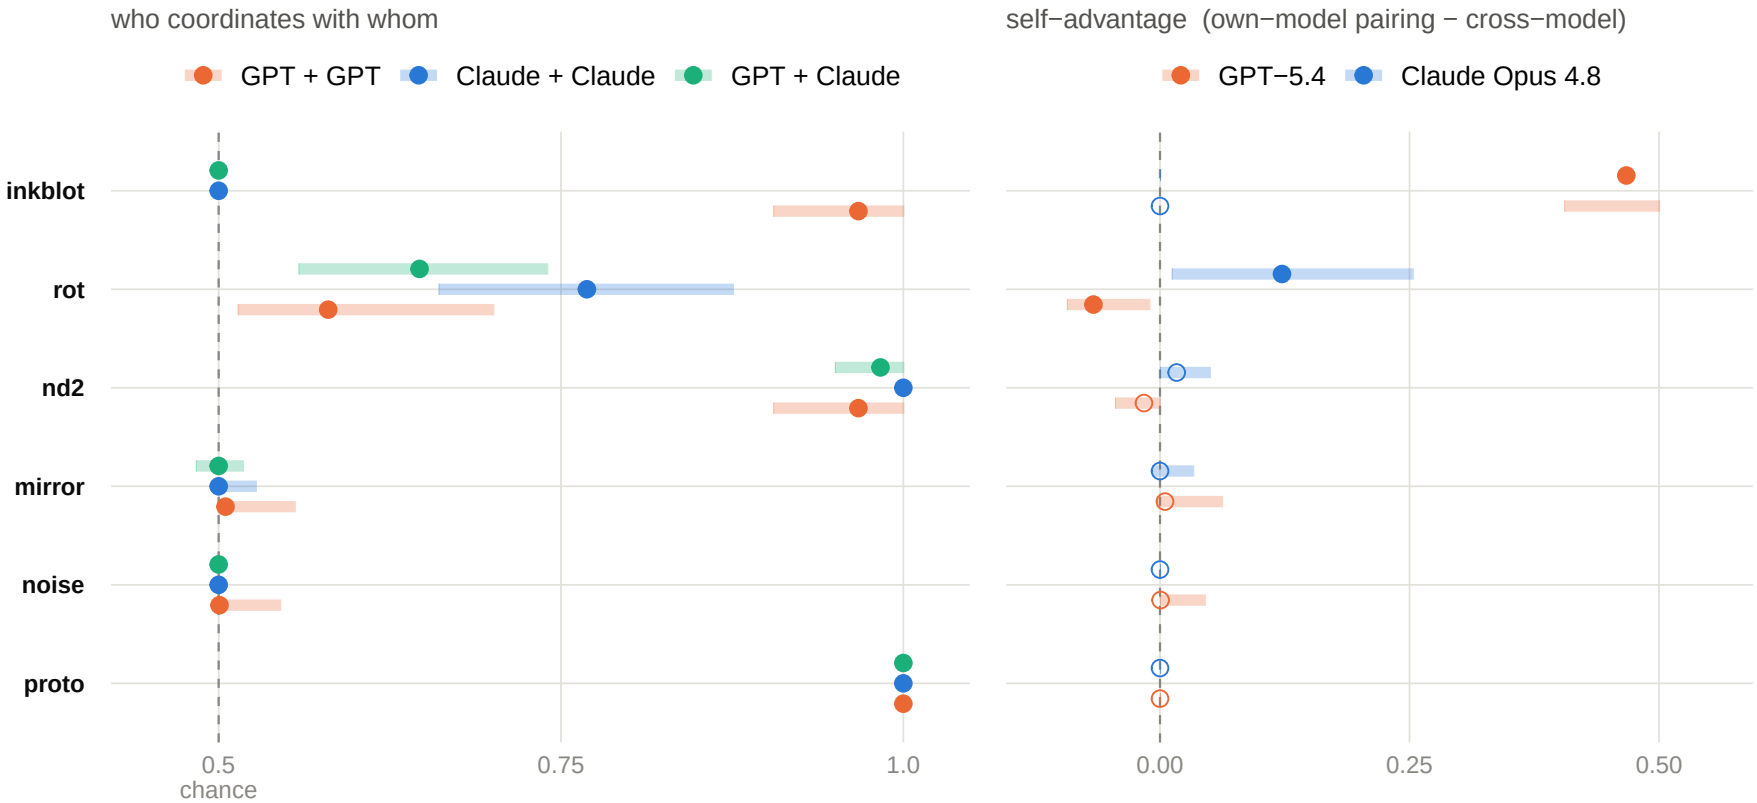
Two stimuli are focal for one model and invisible to the other

inkblot is a GPT−only focal point; rot is a Claude−only one · the rest are shared or flat



Hollow points: 95% CI includes 0. Match computed from choice marginals, orientation−stratified bootstrap (5,000 draws), n=60 per model x stimulus.
Elicited under generic "another instance of you" framing · exploratory, not named−partner.
